Professional Summary

Data Science undergraduate pursuing a minor in Analytics and Big Data, with hands-on experience in Python, Java, Machine Learning, and Data Analysis. Skilled in data interpretation, predictive modeling, and developing practical data-driven solutions through internships and academic projects.

Education

University of Petroleum and Energy Studies Jul 2023 – Present
B.Tech Computer Science – Data Science
GPA: 7.48/10

All Saints Senior Secondary School Jul 2022 – Jul 2023
Intermediate (CBSE): 83%

St. Mary's Convent Sr. Sec. School Jul 2019 – Jul 2021
High School (CBSE): 80%

Technical Skills

Languages: Python, C, Java
Databases: MySQL
Tools: Git, GitHub, Tableau, Power BI
Concepts: Data Visualization, Data Interpretation, Machine Learning

Experience

GAIL India Ltd., Nasirabad | Project Report Intern Jun 2025 – Jul 2025

- Evaluated IT and telecommunication infrastructure to assess network hardware efficiency.
- Investigated SCADA system architecture for industrial monitoring and control.
- Examined routers, switches, and communication protocols to analyze data flow.
- Identified technical issues and supported improvements in system performance.
- Documented findings on SCADA operations and infrastructure optimization.

KRISHAK VIKAS SANSTHAN, Ajmer | Social Intern Jun 2024 – Jul 2024

- Conducted door-to-door surveys to collect data for community development projects.
- Gathered and recorded accurate information from local farmers.
- Assisted community members in completing official documentation accurately.
- Verified and organized collected data for proper record maintenance.

Projects

StrongSync Mar 2025 – May 2025
Java Developer | Tech Stack: Java, MySQL

- Designed and developed the Java-based fitness application interface.
- Implemented BMI calculator using user input data.
- Integrated MySQL database for storing and retrieving fitness records.
- Developed workout routine and meal logging modules.

Sentiment Analysis

Mar 2025 – May 2025

Data Science & Machine Learning Developer | Tech Stack: Python, Machine Learning

- Collected and preprocessed movie review datasets for model training.
- Cleaned text data using tokenization and stop-word removal.
- Built and trained sentiment classification model.
- Evaluated model performance using prediction accuracy metrics.

Railway Reservation System

Mar 2024 – May 2024

Python Developer | Tech Stack: Python, Pickle

- Developed menu-driven railway reservation booking system.
- Implemented passenger record storage using pickle module.
- Created booking, cancellation, and search functionalities.
- Tested system for smooth and error-free execution.

Customer Purchase Behaviour Analysis Using Big Data Analytics

Apr 2026

Big Data Analytics Developer | Tech Stack: Scala, Apache Spark, MLlib

- Loaded and cleaned retail customer transaction dataset using Apache Spark.
- Created TotalAmount feature to analyze customer spending behavior.
- Performed customer segmentation using K-Means clustering algorithm.
- Built feature vectors based on total spending and purchase frequency.
- Classified customers into Premium, Regular, and Medium customer segments.
- Generated customer insights based on purchasing patterns and cluster analysis.

Certifications

- C Language Certification – Programming Express Pvt. Ltd. (May 2023 – Jul 2023)

Positions of Responsibility

- Class Representative
- PR Head, IEEE Computer Society Chapter
- Enabler, Career Services Department
- Core Member, HyperVision Committee
